BE KIDS FOR ONE MOMENT PIGI DESIGN

Through the children's eye, the designer explores the environment and creates spaces that are fun, playful and inspiring. The most important aspect of the design process is the collaboration with the children and their parents. The designer creates a space that is both fun and functional, and that is tailored to the needs of the children. The design process is a journey of discovery, and the designer is always looking for new ways to create spaces that are both fun and functional.
